Vol. 5

COMMUNICATIONS *are invited from all parts of the world.*  
Authors who favor the ANNALS OF OPHTHALMOLOGY AND  
OTOLOGY with contributions are requested to observe the  
following rules:—

1. When an article for publication under the head of  
"ORIGINAL COMMUNICATION," is accepted, it is understood,  
unless specially arranged, that it is to be contributed to the  
ANNALS *exclusively*, and that copies or abstracts of the same  
have *not* been made for and will *not* be published in any other  
journal.

2. Contributions should be type-written. When desired,  
illustrative cuts will be made at the expense of the ANNALS.

3. Proof will be furnished authors for correction and re-  
vision, but it is requested that alteration be limited to mat-  
ters of essential importance, as changes in the copy are  
equivalent to resetting, and cause additional expense and  
annoyance

4. Author will be furnished with reprints of their articles,  
in pamphlet form, handsomely printed on the finest quality  
of paper, at cost. (See next page.)

The ANNALS is published four times a year: On or about  
the last of JANUARY, APRIL, JULY, and OCTOBER. ARTICLES  
for succeeding issues should be in the hands of the editors  
sixty days before date of publication.

## PUBLISHER'S NOTICE.

The rapid increase in the number of Eye, Ear, Nose and Throat Specialists has created a demand for a PRACTICAL journal devoted to OPHTHALMOLOGY, OTOTOLOGY, RHINOLOGY AND LARYNGOLOGY. Indeed, the special journal has become a necessity, not only to specialists but to general physicians and surgeons who attempt to profit by the results of the investigation and researches of capable observers and workers in these four important branches of medical science. No longer ago than January, 1891, the founders of the ANNALS OF OPHTHALMOLOGY AND OTOTOLOGY arranged for producing Quarterly issues of 5000 copies each, of an 80-page magazine, with the belief that it would fill the requirements for a number of years, but before the end of the first year the doubling process was necessitated, and has continued, so that an examination of a copy of any recent issue suggests the thought that the founders of so useful a publication "builded better than they knew."

The large circulation of the ANNALS not only renders it one of the best channels for the publication of meritorious contributions to literature of Ophthalmology, Otology, Rhinology and Laryngology but it also makes it a years valuable medium for advertising medical and surgical supplies of merit.

The subscription price for 1896 will be \$5.00, and it is expected that all who desire the ANNALS will remit promptly.
